

## The most advanced e-Mentoring solution

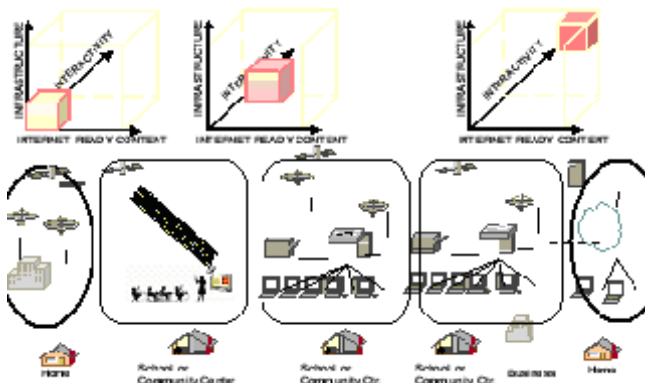

We introduce ieMentoring as an integrated solution combining content management, video conferencing for interacting with a mentor in real-time, white board sharing for communicating ideas, application sharing for collaborative work, profile portfolios for assessment or evaluation and a focused digital library for personalized support. and knowledge management. A complex system integration of components is necessary to implement the ieMentoring environment. Combined with our ieBroadcast family of data and media broadcast solutions it becomes the most powerful and complete e-learning environment for universal and global access to education and training.

### Collaboration

### System Architecture & Taxonomy of Access

### Access

## Ready to Deploy Solutions

**ieMentoring** our Integrated Electronic Mentoring Application Building Platform was designed and developed too support all forms of e-learning, training, and coaching across the Internet as well as just-in-time consulting for all interactive collaboration and media-intensive applications.
